What Is the SAPS Psigometriese Toets?

The SAPS psigometriese toets, or psychological test, is a standardized assessment used by SAPS to evaluate the psychological ?tness and suitability of candidates applying for various positions within the police service. This test is critical because working in law enforcement demands not only physical ability but also mental resilience, emotional stability, and strong decision-making skills.

Unlike physical ?tness tests, the psigometriese toets focuses on assessing your personality traits, cognitive abilities, and psychological pro?le. The goal is to ensure that applicants can cope with the high-pressure situations, ethical challenges, and responsibilities that come with policing.

Screen for potential behavioral risks or psychological conditions that could impair

job performance.

By ?ltering candidates through this test, SAPS aims to select individuals best suited for

the demanding nature of law enforcement careers.
