Natural Extracts and Their Bene?ts

Several formulations feature botanical extracts such as green tea, chamomile, and aloe vera. These ingredients are renowned for their antioxidant, anti-in?ammatory, and soothing properties. For example, green tea extract is rich in polyphenols, which help combat oxidative stress ? a major contributor to skin aging and in?ammation.

Aloe vera, frequently included for its hydrating and healing e?ects, complements the other natural extracts by enhancing skin barrier function and reducing irritation. The inclusion of these botanicals aligns with the growing consumer trend toward natural and clean beauty products.

Active Chemical Agents

On the synthetic side, ingredients such as hyaluronic acid, peptides, and retinol analogs often appear in Duncan Manley?s active ingredient list. Hyaluronic acid is a powerful humectant that attracts moisture to the skin, improving hydration levels and plumpness.

Peptides serve as signaling molecules that encourage collagen production, which is crucial for maintaining skin elasticity and ?rmness.
